Business System Analyst

Job Description:

We are seeking a talented and detail-oriented System Analyst to join our platform engineering team at solve.care company.

As a System Analyst, you will play a crucial role in analyzing and improving our software systems, ensuring their efficiency, reliability, and scalability.

You will collaborate with cross-functional teams, including software engineers, product managers, and stakeholders, to understand and translate business requirements into technical solutions. Your expertise in systems analysis and problem-solving will be essential in optimizing our platform for performance and user experience.

Only candidates from product-based companies would be preferred.

Roles & Responsibilities :

- 8 years as a Business Systems Analyst, Technical Systems Analyst, Requirements Analyst, or other related role
- Collaborate with stakeholders to gather requirements and translate them into technical specifications for the development team.
- Analyze the current application and identify areas for improvement.
- Write user stories that accurately capture the business requirements of the team
- Create UML, Functional and non-functional documents with swimlame diagram and Figma wire framing.
- ensuring that solutions are optimized for usability and performance.
- Work with other members of the product team to design, develop, test, and deploy solutions on the Solve care platform.
- Communicate technical concepts to both technical and non-technical
- stakeholders in a clear and concise manner.
- Ability to transform complex business requirements into technology solutions leveraging research, analytical, and problem-solving skills with little direction
- Advanced knowledge of Agile frameworks and practices (e.g. Scrum, Kanban, SAFe)
- Advanced knowledge of the System Development Life Cycle
- Advanced skill is use of Business Process Model and Notation (BPMN 2.0)
- Effective verbal, written, and interpersonal communication skills with ability to present complex technical information to non-technical audiences
- 5+ years of Hands-on development experience using technology Java/J2ee, Spring, hibernate.
- Hands-on experience in analysis, design, coding, and implementation of complex, custom-built applications.
- Core JAVA, Strong OOPs concept, Strong Database Development SQL/PL SQL/Oracle/MySQL, PostgreSQL, NoSQL), Webservices(Rest/Soap),Spring, Multithreading, Concurrency, Java Designing Development as an individual Contributor.
- Good to have JavaScript.
- Great OO skills, including strong design patterns knowledge.
- Familiarity with few databases, like MySQL, PostgreSQL, NoSQL etc
- Knowledge of software best coding standard practices.
- Knowledge or REST SOAP WebServices.
- Knowledge of Design Patterns.

- Knowledge of JIRA, Service Now would be Plus.

Requirements:

1. Bachelor's degree in Computer Science, Information Systems, or a related field. A master's degree is a plus.
2. Strong analytical and problem-solving skills, with the ability to think critically and propose innovative solutions.
3. Excellent communication and collaboration abilities, with the capability to work effectively in cross-functional teams.
4. Knowledge of the English language: Upper-Intermediate level
