Опис вакансії

Hello,

We are looking for an experienced Audio Software developer with extended experience in low-level audio, music and data processing, and cross-platform development. The successful candidate will be responsible for developing audio playback/recording, music, and score components, as well as native plugins.

Ideally, we are looking for a candidate with a strong C++ coding experience, audio experience (audio engine architectures, building audio processing libraries, ...) and experience developing apps or software for iOS, Android, macOS and Windows.

Required skills and experience:

- Strong software engineering background.
- Strong C/C++ experience.
- Experience with audio engines (real-time microphone input, speaker output, audio processing chains).
- Experience with C#, Objective-C.
- Experience with Unity and mobile app development is a plus.
- Experience with Python, JavaScript, WebAssembly and Java is a plus.
- Experience with software development tools and technologies such as Git, Agile development methodologies, and testing frameworks.
- Capable of managing multiple large code bases with dependencies.
- Strong problem-solving and analytical skills, with an attention to detail and accuracy.
- English speaking, excellent communication skills, open-minded, precise and solution-oriented. Initiative and involvement are highly appreciated.
- You play a musical instrument and can read traditional music notation.

If you're interested or know someone who would be a good fit, please send me the resume to nolivero@tomplay.com .
