Опис вакансії

outstaff company Webiz International LLC is looking for a Senior Full Stack Engineer to join our client's innovative and dynamic team. The ideal candidate should have significant experience in developing high-quality software design and architecture, with the ability to contribute to cutting-edge advancements in veterinary medicine.

In this role, you will focus on designing, testing, and implementing new and improved software solutions, which play a pivotal role in the future of veterinary technology. SignalPET leverages pure AI to assist veterinarians by providing accurate analysis of veterinary radiographs, ensuring better diagnostics and treatment for companion animals.

Responsibilities:

Develop applications and tools through writing clean and efficient code.

Conduct thorough code reviews, write unit, integration, and performance tests, and validate software to enhance code quality.

Perform advanced debugging to resolve issues and enhance performance.

Instrument code for performance metrics, identifying and addressing bottlenecks.

Research and propose new methodologies to improve the efficiency and quality of the platform.

Take ownership of software and applications throughout the SDLC, including documentation and monitoring.

Collaborate with internal teams and customer support to improve product utilization and resolve issues.

Requirements:

5+ years of experience as a Backend or Full Stack Developer.

Strong coding skills.

Proven experience with TypeScript and React.

Experience with Node.js is an advantage.

Familiarity with the Remix framework is a plus.

Proven experience with relational databases such as MySQL or PostgreSQL.

Proficiency in building high-quality, performant, and supportable software systems with containers on AWS.

This role offers the chance to make a real impact in the veterinary tech space, driving the future of how companion animals are diagnosed and treated with AI.

Tech stack

TypeScript React MySQL Postgre SQL AWS ECS/S3
