## Опис вакансії

our outstaff company is looking for a Backend Developer for our client Fundbox. You will develop new core components of our product. You will architect and implement complex services, such as online credit functionality, new Fundbox APIs, marketing and analytics tools, and much more. Our engineering team cares deeply about the speed, quality, and ease of our work, so we constantly strive to improve it by practicing continuous deployment, code reviews and automating everything.

## Requirements:

At least 4 years of industry experience in a software engineer position

Designed and built a complex software solutions

Willing to work with Python

Experienced in at least two programming languages. It would be awesome if Python is one of them, but it's not a must if you are a quick learner

Experience with relational DBs

Experience in Linux environment

## Advantage:

Experienced with micro-services architecture

Experience with Redis, NoSQL DB

Tech Stack

Python Relational Databases Redis NoSQL AWS ECS/S3 Node.js

Experience in AWS
