# Blockchain Developer, 84000 грн.

📍 Київ, 🕒 4 квітня

Компанія: [Paylix Ukraine](https://jobs.ua/company/id/1599927) (<https://jobs.ua/company/id/1599927>) ([Всі вакансії](#))

Рубрики: [IT, WEB фахівці](#)

## Побажання до співробітника

Освіта: повна вища  
Досвід роботи: від п'яти років  
Графік роботи: віддалена робота

## Опис вакансії

our client is developing next-generation blockchain infrastructure to democratize block space access and counter the centralization in the ecosystem. We're seeking an experienced developer proficient in Rust and blockchain technologies to join our innovative team. In this central role, you'll design high-performance systems optimized for low latency and scalability through AI-driven innovation, significantly impacting a fairer, more efficient blockchain ecosystem.

### About the Role:

- Design and develop scalable backend services in Rust, focusing on ultra-low latency and high throughput.
- Architect and implement innovative off-chain protocols that revolutionize the EVM execution engine and enable ultra-parallelized block generation.
- Collaborate with researchers to integrate AI-driven solutions and cutting-edge approaches.
- Optimize system performance through advanced coding practices and low-level programming techniques.
- Influence critical decisions and drive impactful results through your expertise.

### Responsibilities:

- Design and develop scalable backend services in Rust, focusing on ultra-low latency and high throughput.
- Architect and implement innovative off-chain protocols that revolutionize the EVM execution engine and enable ultra-parallelized block generation.
- Collaborate with researchers and the community to integrate AI-driven solutions and cutting-edge approaches.
- Optimize system performance through advanced coding practices and low-level programming techniques.
- Influence critical decisions and drive impactful results through your expertise.

### Qualifications:

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- 6+ years of experience in backend development focusing on high-performance, low-latency systems.
- Expertise in Rust; familiarity with Go and C++ is a plus.
- Strong understanding of blockchain technologies, particularly Ethereum.
- Proficiency in Python for research and tooling.
- Experience with blockchain development tools such as revm, reth, geth, Remix, etc.
- Excellent problem-solving skills and effective communication.

### Preferred Qualifications:

- Experience with designing innovative protocols and off-chain solutions.
- Familiarity with Docker, Kubernetes, and high-performance systems.
- Knowledge of AI and machine learning applications in system optimization.

### Tech stack

Rust Python Docker Kubernetes English
