

Ваш надійний помічник

Senior Python Full Stack Developer

📍 Київ, 🕒 12 серпня

Компанія: [Interexy](https://jobs.ua/company/id/1642686) (<https://jobs.ua/company/id/1642686>) ([Всі вакансії](#))

Рубрики: [IT, WEB фахівці](#), [Робота за кордоном](#)

Побажання до співробітника

Освіта: не має значення
Досвід роботи: не вимагається
Графік роботи: вільний графік роботи

Опис вакансії

Senior Python Full Stack Developer

Location: Remote

English: Upper-Intermediate+ (critical)

Tech stack:

Frontend: Vue / React (strong level — this is a key factor)

Backend: Python

Database: PostgreSQL

Infrastructure: AWS, Docker

Key requirements:

Strong frontend skills (critical) — pixel-perfect implementation from Figma

End-to-end development experience (full-stack, not a narrow profile)

API integrations (email, search, etc.)

Working with business logic

Database design and optimization (Postgres)

Ability to collaborate with a designer and PM

Attention to detail (UX, components, performance)

Experience with production projects (real users)

Nice to have:

OpenSearch / TypeSense

Experience with AI (not a priority)

Globally, the project is a news aggregator focused on AI/Technology.

What needs to be done:

Current priority tasks:

Unifying the authorization flow

Hybrid search — keyword + semantic. Lots of pitfalls here: performance, result validity (there may be gaps in the data that another person is responsible for), and formulas for merging results between keyword and semantic search

Graph visualization

Reporting

Google Docs — every step must be validated with metrics on "result relevance" and performance

Google Sheets — same as above

Always show up for daily standups

Always be available during working hours
